Bringing It All Together

Section 508 of the Rehabilitation Act

requires products to be made accessible when they are developed, procured, maintained or used by the U.S. federal government. This requirement applies to all levels of government including State and County.

CentreIT has significant experience

at all levels of government to provide industry leading 508 compliance tools, assessment techniques, and remediation of your public facing portals.

CentreIT helps you comply with the Section 508 standards and **minimize the financial risk** of non-compliance.

Helping your organization to meet the needs of Section 508 and minimize the cost of compliance

With Federal laws enacting 508 compliance in place for over 20 years, the Federal Department of Justice has begun to file suite against counties, states, and large commercial organizations lacking 508 compliance. In many documented cases the costs of non compliance are far higher than the average cost for remediation. CentreIT provides a cohesive 508 compliant process including project management, requirements, coding standards, development, testing, and maintenance as well as vendor coordination for vendor products or RFP proposals to minimize or negate legal action.

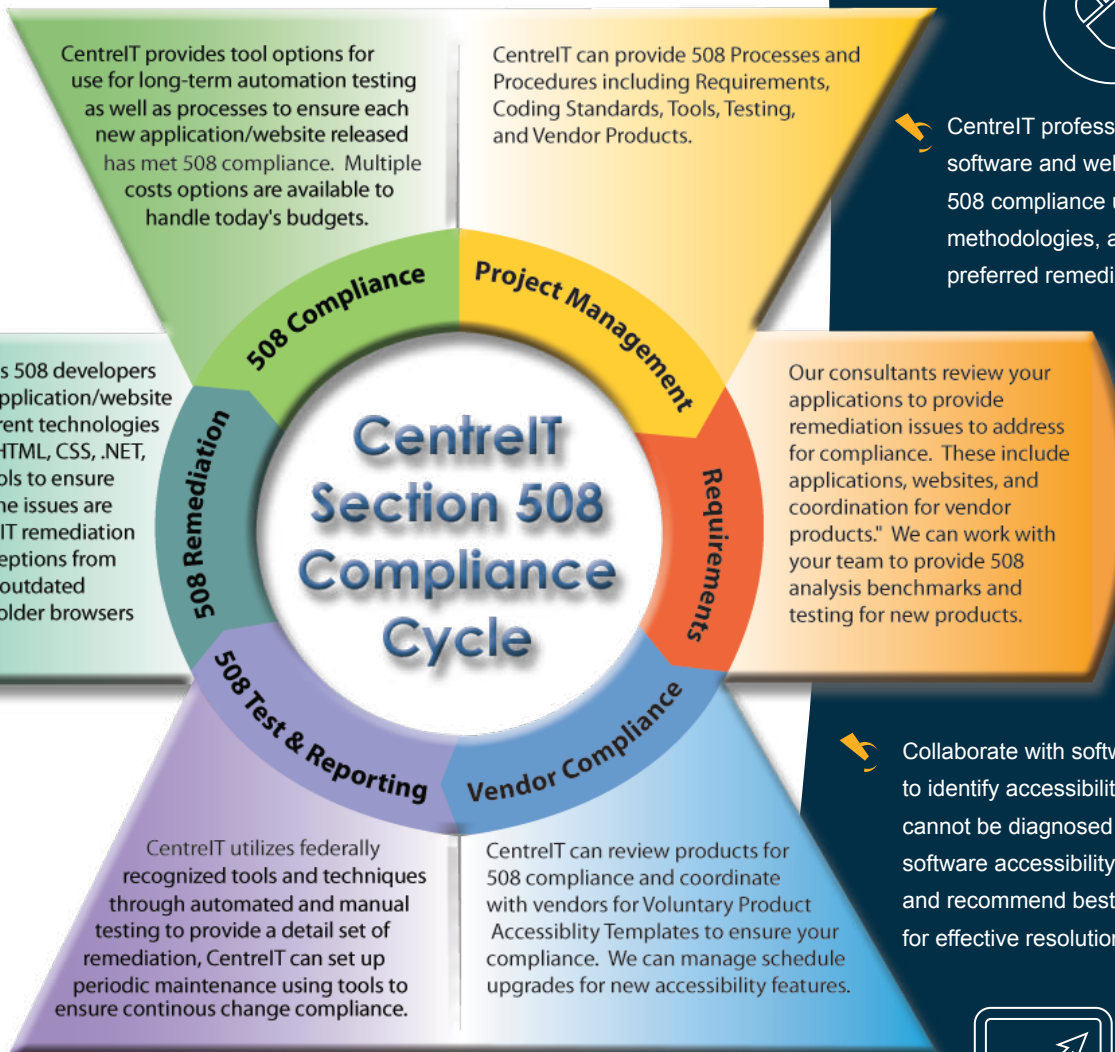

WHO ARE CENTREIT CUSTOMERS?

- CentreIT provides services to all levels of Government organization including County, State and Federal branches. CentreIT works with Commercial enterprise in multiple markets including telecom, banking, manufacturing, media and more.

- CentreIT professionals Assess software and web sites for Section 508 compliance using proven testing methodologies, and indicate preferred remediation techniques.

- Collaborate with software developers to identify accessibility issues that cannot be diagnosed by automated software accessibility checkers, and recommend best practices for effective resolution.

508 COMPLIANCE CONSULTING THAT PROVIDES A TOTAL END TO END SOLUTION.
