

Reporting Services

"CentreIT is one of the leading Reporting experts internationally. We can support your reporting needs from simple queries to complex cross-tab or OLAP reporting. "

Reporting with CentreIT teams includes management, design, implementation, and testing. CentreIT Reporting services include Reporting Project Planning/Methodology, Reporting Design and Implementation, Performance Testing and Tuning, Database design.

CentreIT consistently supports multiple reporting environments integrating and developing with Business Objects, Crystal, Cognos, Brio and Reporting Services. In many cases these are integrated into custom applications including dashboards, intranets and web applications.

CentreIT understanding reporting needs and having supported full methodologies for ISO9000, SEI, CMM, or PMP evaluations, has developed a custom reporting methodology to cut up to 75% off the design and development time for reporting implementations. We have special design tools to help project the system specifications as well as capture your business report design.

These tools have been incorporated into CentreIT products to allow for your reuse on later projects. This project planning incorporates system specification and ordering as well as the reporting database needs to provide the best performance for your users. Every CentreIT reporting project or tuning effort is provided with this methodology free of charge to our clients.

CentreIT design and implementation includes the use of CentreIT products that have allowed us to streamline our development. If an existing development is to be integrated, these tools provide a fast means to reengineer specifications so CentreIT developers can get quickly up to speed to incorporate changes. Use of these tools can cut the schedule for completion by no longer requiring a manual effort over several weeks. Understanding of databases lets CentreIT provide the quickest reports by allowing reporting tools to utilize the database to narrow searches and use database stored procedures to optimize queries. This understanding lets CentreIT take reports previously taking many hours down to only a few minutes to run.

Contact us today to see how you can get up to 500% performance improvement in your reporting efforts!
