

Financial Industry - Customer Highlights

Freddie Mac

This project represented the first Online Loan and Appraisal program which spawned today's electronic loan submission processes. CentreIT worked with the Default Scoring project which began today's industry standard weighting systems for loan default recovery.

Our Performance Successes ...

... CentreIT's expertise with Crystal Reports gained performance improvements for Geelong hospital with their reports from hours down to minutes for processing times.

... CentreIT improved upgrades that were routinely taking 3 days down to 3 hours by optimizing database and SQL script performance.

... CentreIT's performance tuning efforts transformed seven day processes automated to run in a few hours.

... This project was 16 months behind schedule at start of effort. CentreIT personnel were brought in and delivered the project on-time and within budget within a 3 month period.

... CentreIT successfully built an extremely high transaction rate system of over 500,000 transactions bursts within 2 minutes windows.

... CentreIT database performance expertise successfully gained performance improvement of reports from 12 hours to 15 minutes.

... Dramatically improved performance of the reporting system processes from 9 hours to 7 minutes.

... CentreIT tuned high transaction provider data loads, improving existing performance from 13 hours down to 30 minutes

Janus

CentreIT performed development and database management for mutual funds, trading systems, and data feeds for over 20 databases. Janus maintains the largest Merrin and Charles River trading databases. CentreIT provided services including installation and administration of Crystal Enterprise and Business Objects installation site-wide including feeds to and from Janus SAP environment. CentreIT performed document management installation using iManage for automated workflow including integration with Exchange as well as Sarbanes Oxley database compliance.

Moodys

CentreIT services included production management of over 1000 database servers including Sybase, SQLServer, and DB2. CentreIT increased performance and productivity as well as stabilized systems. CentreIT implemented monitoring tools for automated notification and Sarbanes Oxley compliance and developed and implemented Sarbanes Oxley compliant procedures for the production database group.

Archstone-Smith

This project represented the First National Web Online Leasing program and Lease Rent Optimization bringing online airline and car rental algorithms for adjusting prices based on seasonal fluctuations and vacancy availability. CentreIT assisted with the application's integration with Authorize.Net and SafeRent for criminal/credit checks. CentreIT also worked with the neighborhood and maintenance system for customer use after move-in.

ANZ Bank

CentreIT performed upgrades of Sybase system, database administration and performance tuning.
